CONTENTS

Volume 12, Issue Nos. 1–4

OPTIMAL CONTROL APPLICATIONS & METHODS

Issue No. 1, January–March 1991

A Turnpike Improvement Algorithm for Piecewise Deterministic Control: K. Boukas, A. Haurie and Ch. van Delft 1

The Non-linear Beam via Optimal Control with Bounded State Variables: H. Maurer and H. D. Mittelmann 19

Robust Quadratic Optimization of Systems with Large Parameter Variations: M. Eslami 23

Optimal Temperature Control of Jacket-cooled Fermentation Reactors: D. A. Gee and W. F. Ramirez 49

SHORT COMMUNICATION

Stability and Identifiability of Parameters in Galerkin Approximation of Distributed Systems Under Multiple Inputs: K. Kunisch and L. White 63

Issue No. 2, April–June 1991

Design of a Field Voltage Controller for a Synchronous Generator Using Feedback Linearization: W. Mielczarski and A. M. Zajaczkowski 73

Multipurpose Controller Design in Multivariable Stochastic Control Systems: S. Bańka 89

On MIMO Optimal Preview Tracking Control for Known Trajectory Models: H. A. Pak and R. Shieh 119

Issue No. 3, July–September 1991

Design of a Low-sensitivity, Minimum Norm and Structurally Constrained Control Law Using Eigenstructure Assignment: S. P. Burrows and R. J. Patton. 131

A Computational Method for a General Class of Optimal Control Problems Involving Integrodifferential Equations: M. A. Lukas and K. L. Teo 141

Indexed or abstracted by 'Cambridge Sci. Abstracts', 'Compumath Citation Index', 'CC/Eng. Tech. & Applied Sciences', 'Engineering Index', 'Eng. Societies Library', 'INSPEC', 'Int. Abstracts in Operations Research', 'Research Alert', 'SCISEARCH Database'. 'Zentralblatt für Mathematik'.

On Stable Full-order and Reduced-order LQG Controllers: Y. Halevi, D. S. Bernstein, W. M. Haddad 163

Comparison of Two Methods for the Design of Active Suspension Systems: A. G. de Jager 173

SHORT COMMUNICATIONS

Multilevel Learning Control of an Absorption Column: K. Najim and M. Chtourou . 189

A Modified Optimal Load–Frequency Controller for Interconnected Power Systems: C. M. Liaw 197

Issue No. 4, October–December 1991

Optimal Digital Redesign of Cascaded Analogue Controllers: L. S. Shieh, B. B. Decrocq and J. L. Zhang 205

Optimization of a Photocell: Y. Achdou and O. Pironneau. 221

Solving Robot Trajectory Planning Problems with Uniform Cubic B-splines: Y.-C. Chen 247

SHORT COMMUNICATION

A Revisit to the Student Learning Problem: Y. H. Chen 263

Further Results on the Optimal Regulation of Spacecraft Angular Momentum: H. Bourdache-Siguerdidjane 273

A Global Cartesian Space Obstacle Avoidance Scheme for Redundant manipulators: S. E. Khadem and R. V. Dubey 279
